PROFESSIONAL SUMMARY

Information Science and Technology student at Debre Berhan University with a strong interest in cybersecurity, Linux, networking, and web application security. Developing practical skills through cybersecurity training and the EthioVuln web vulnerability assessment project. Seeking an internship to learn from experienced professionals, strengthen technical skills, and contribute to a security team.

EDUCATION

Debre Berhan University — Information Science and Technology

Currently enrolled

CYBERSECURITY TRAINING

INSA Cybersecurity Bootcamp — 5th Batch (2026)

Cybersecurity training with practical learning activities in Linux, security monitoring, defensive security, and capture-the-flag (CTF) exercises.

PROJECTS

EthioVuln — Web Vulnerability Assessment Platform

- Developing a platform to support web application vulnerability assessment.
- Project technologies include a Python/FastAPI backend and a Next.js/TypeScript frontend.
- Project goals include organizing scan results and security findings into reports.
- GitHub: github.com/melakudeguale9-droid/ethiovuln

TECHNICAL SKILLS

Cybersecurity: Web application security fundamentals, vulnerability assessment concepts
Operating Systems: Kali Linux, Linux fundamentals, Windows
Programming: Python, C, C++, JavaScript/TypeScript
Web Development: HTML, CSS, Next.js (project exposure)
Frameworks: FastAPI
Tools and Platforms: Git, GitHub, GitLab, TryHackMe

CAREER OBJECTIVE

To gain practical experience through a cybersecurity internship, contribute responsibly to authorized security work, and continue developing skills in vulnerability assessment, network security, and web application security.
