PROFESSIONAL SUMMARY

Information Science and Technology student at Debre Berhan University with a strong interest in cybersecurity, Linux, networking, and web application security. Developing practical skills through intensive cybersecurity training and the engineering of the EthioVuln web vulnerability assessment project. Seeking professional opportunities to learn from experienced industry experts, strengthen technical capabilities, and contribute responsibly to a security team.

TECHNICAL SKILLS

Cybersecurity:	Web App Security Fundamentals, Vulnerability Assessment, Defensive Security, CTF
Operating Systems:	Kali Linux, Linux Administration, Windows
Programming:	Python, C, C++, JavaScript/TypeScript
Web & Frameworks:	FastAPI, Next.js, React, Tailwind CSS, HTML, CSS
Tools & Platforms:	OWASP ZAP, Git, GitHub, GitLab, Docker, TryHackMe

CYBERSECURITY TRAINING & EXPERIENCE

INSA Cybersecurity Bootcamp — Jul 2026 – Oct 2026

Information Network Security Administration — 5th Batch

- Completed intensive training with practical learning activities in Linux, security monitoring, and defensive security.
- Engaged in rigorous Capture-The-Flag (CTF) exercises to apply theoretical concepts to real-world scenarios.
- Developed and documented the **EthioVuln** capstone project under Option A.

FEATURED PROJECTS

EthioVuln — Web Vulnerability Assessment Platform — View GitHub ↗

- Developed an automated platform to support comprehensive web application vulnerability assessments.
- Engineered the backend using **Python and FastAPI**, ensuring rapid and asynchronous API processing.
- Built a responsive and interactive frontend dashboard utilizing **Next.js and TypeScript**.

- Implemented automated reporting logic to organize scan results and security findings into executive reports.

EDUCATION

Debre Berhan University

Currently Enrolled

BSc in Information Science and Technology

CERTIFICATIONS & CREDENTIALS

- **Udacity Nanodegree Programs (Nov 2025):** Android Developer Fundamentals, Data Analysis Fundamentals, AI Fundamentals, Programming Fundamentals.
- **e-SHE Ministry of Education (Nov 2025):** 12 Verified Certificates including AI Essentials, Online Safety, Academic Integrity, 2FA, and Resource Evaluation (in partnership with Mastercard Foundation & Arizona State University).
